

## **Bio LA ÉLITE**

La Élite is a group that was born in Tàrrrega during the year 2015 as a result of boredom and the need to spend time in a more or less “productive” way. So, during that same summer Nil and Diosito locked themselves in the garage for 4 afternoons and made their first demos, from which songs like Marlburro came out.

The band will continue for a few years making demos for pure fun and without any kind of claim beyond making music with synthesizers and drum machines. Until 2020 there is not much to add, they just do their own thing.

It is not until the end of the pandemic that they release music again and decide, after 7 years, to play live. Since then, the band has not stopped growing based on single releases, later their debut album, and with a very electric live show, irreverent, and cheeky, filling up virtually all of their concerts and festivals on a grand tour for Spain.

In November 2023 they plan to release the new singles to what will be their second lp, which is planned for Feb/March 24 release.
