

# LA ÉLITE

LA ÉLITE is a band that was born in Tàrrega in 2015, out of boredom and the need to spend time in a more or less “productive” way. That same summer, Nil and Diosito locked themselves in a garage for four afternoons with a synthesizer and a drum machine. The result was their first demo, made purely for fun and with no expectations.

Ten years later, the band has not stopped growing through new music and by developing a highly electric, irreverent and shameless live show, filling some of the best venues and festivals in the country, as well as taking their signature sound across half of Europe. LA ÉLITE continues to evolve, fusing genres and shaking up the alternative music scene while remaining faithful to the style and attitude that have turned them into a generational phenomenon.

Following their debut album, two new records arrived in 2024, keeping their DIY spirit intact and pushing the band's talent, vision and energy to the limit, consolidating them as leading figures in synth-punk and one of the most interesting bands on the scene.
